

Technical Data Sheet

POLYPROPYLENE FIBERS 18 μ m Monofilament Product Code Prefix: PPSTM-018NRR

General Description: Polypropylene is a manufactured fiber in which the fiber-forming substance is a long-chain synthetic polymer composed of at least 85% by weight of propylene units. This 18 μ m monofilament is a very fine fiber that is specially suited to reduce shrinkage and prevent crack formation in cementitious materials, as well as reducing the potential for explosive fragmentation of concrete when exposed to fire or intense heat.

Standard Filament Size: 18 μ m

Standard Cut Lengths: 3mm, 6mm, 12mm, 18mm

Tensile Strength: \geq 557 MPa

Elastic Modulus: \geq 4.1 GPa

Specific Gravity: 0.91 g/cm³

Average Moisture Absorption: <0.1%

Effects of Heat: Softens at \sim 160°C / \sim 320°F. Melts at \sim 168°C / \sim 335°F.
Decomposes at \sim 288°C / \sim 550°F.

In concrete, with the development of intense heat, the fibers will melt and create small capillary cavities, which can delay explosive fragmentation.

Chemical Resistance: Good resistance to acids and alkalis. Physically resistant to chemicals in concrete.

Performance Characteristics: This fiber is specially treated to reduce air intake in cementitious products, which decreases porosity and improves strength. It has high dispersibility in the matrix, and the fineness of the fibers results in a high fiber frequency and increased surface area. This provides increased tensile strength and helps to evenly distribute early shrinkage tension, thus reducing the formation of cracks and long-term weaknesses in the material. The 18 μ m product is preferred for use in wet mixes.

Other Characteristics: One of the lightest of all fibers. Not attacked by microorganisms, mold or mildew. Low thermal conductivity. Very little tendency to acquire static charge.

Packaging: Standard packaging is corrugated boxes with polyethylene liners. Other packaging available upon request.

The above information is provided to describe typical values and does not constitute a product specification. MiniFIBERS warrants that for each Product sold, such Product will meet the standard specifications provided for that Product and will be of a quality consistent with the standard specifications. This is the sole warranty given with respect to the Product, and is given expressly in lieu of any other warranties, expressed or implied, including without limitation any implied or general warranty of merchantability or of fitness for a particular purpose. It is expressly understood that any technical advice or assistance that may be provided by MiniFIBERS is rendered without compensation, and MiniFIBERS assumes no obligation or liability for such advice or assistance given, or for results obtained.
